Subject Index

A

Abscisic acid
  amylase synthesis, wheat, 692
  freezing resistance, wheat/rye/bromegrass, 71
  germination, tomato, 935
  nonstomatal inhibition of photosynthesis, *Pharbitis*, 529
Abscission
  light and shade effects, soybean, 434
  light control, mung bean, 450
Acer saccharum (*see* Sugar maple)
N-Acetyl methionine sulfoxide reduction, 619
Acetylene, reduction rates, soybean, 648
O-Acetylserine, H_2S emission, pumpkin, 560
ADPGlucose synthesis, guard cells, *Commelina*, 862
African violet, anther-derived plants, ribulose bisphosphate carboxylase, 639
Aleurone, amylase synthesis, ABA and ethylene effects, wheat, 692
Alfalfa
  ozone and ribulose-1,5-bisphosphate carboxylase, 185
  xylem flow and pit membranes, 1020
Allantoin, automated analysis, soybean, 511
Allium porrum L. (*see* Leek)
Allomyces macrogynus, respiration of gametangia, 111
1-Aminocyclopropane-1-carboyxlic acid, conversion to ethylene, bean, 784
Amylase
  inhibitor, barley, 1008
  synthesis, ABA and ethylene effects, wheat aleurone, 692
Anacystis nidulans, iron deficiency and Chl organization, 250
Anaerobiosis, photosynthetic development, *Echinochloa*, 332
Anise, gibberellin purification and separation, 398
Anther-derived plants, ribulose bisphosphate carboyxlase, African violet, 639
Aphanocapsa, Fe-S centers and Fe deficiency, 724
Apium graveolens L. (*see* Celery)
Apple
  fruit polyribosomes, 754
  fruit ripening and membranes, 636
  gibberellin purification and separation, 398
Arachis hypogaea L. (*see* Peanut)
Arginine
  catabolism, pea, 525
  metabolism, jack bean/soybean, 965
Ascorbate uptake, spinach, 41
Asparagine, synthesis and inhibition, pea, 165
Asparagus sprengeri, photosynthesis and H^+ efflux, 828
ATP, proteolytic activity, spinach, 902
ATPase
  H^+-pumping,
    inhibitor sensitivity, *Hevea*, 973
    oat, 921
Atrazine binding, and secondary PSII acceptor, pea, 703
Auxin
  and ethylene, *Pellia*, 395
  and ethylene production, pear, 1013
  metabolism, and ethylene production, tobacco/sugar beet, 598
Avena fatua L. (*see* Wild oat)
Avena sativa L. (*see* Oat)
Avocado, 5-methylthioribose recycling to methionine, 257
Azide, K uptake rhythm, *Lemna*, 605

B

Barley
  N-acetyl methionine sulfoxide reduction, 619
  amylase inhibitor, 1008
  calmodulin characterization, 666
  leucine uptake regulation by glutamine, 135
  nitrate uptake and efflux, 100, 105
  O_2 evolution and Chl fluorescence, 534, 542
  proton flux and root elongation, 199
  PSI and PSII localization, 203
  ribulose bisphosphate carboxylase synthesis, 906
Bean
  bicarbonate/CO_2-enhanced ethylene production, 784
  cell wall proteinase, 576
  Chl *a* in *a*/*b* protein complex, 16
  chloroplast protein, senescence, 507
  fluorescence quenching by O_2, 886
  IAA content and growth response, 130
  roots, cytokinins, and leaf growth, 76
  SO_2 and O_3 effects on [^{14}C]photosynthate, 630
Bell pepper
  leaf starch metabolism, 61
  plastic film and water stress alleviation, 87
  plastid terpenoid metabolism, 94
Benzylaminopurine, malate oxidation, potato, 945
Black gram, cyanide-resistant respiration, 82
Black oak, phospholipids and phospholipase, 179
Bromegrass, ABA-induced cold hardiness, 71
Bromo inermis (*see* Bromegrass)

C

^{14}C distribution, serine and phosphoglycerate, grape, 579
C_3/C_4 plant, CO_2 uptake quantum yield, 555
Cadmium uptake, soybean, 844
Calcium
  chitosan-induced release, soybean, 698
  gravity-induced transport, maize, 874
  -selective site, PSII, spinach, 309
Callus, shikimate pathway activity, tobacco, 228
Calmodulin, barley, 666
Canavalia ensiformis L. (*see* Jack bean)
Canavanine metabolism, jack bean/soybean, 965
Capsicum annuum L. (*see* Bell pepper)
Carbohydrate, inhibition of photosynthesis, wheat, 681
Carbon
  assimilation and export, soybean, 297
  exchange, root-zone temperature effects, tomato, 46
  metabolism response, vegetative apex removal, soybean, 6
  nodulation effect on partitioning soybean, 713
  photosynthetic flow to mannitol, celery, 869
  transport, *Chlamydomonas* mutant, 273
Carbonic anhydrase-deficient mutant, CO_2 and growth, *Chlamydomonas*, 268
Carboxylic acid, photosynthesis and H^+ efflux, *Asparagus*, 828
Carrot
  inhbition of prolyl hydroxylase, 324
  plasma membrane vesicle orientation, 385
Carthamus tinctorius (*see* Safflower)
Castor bean
  N-acetyl methionine sulfoxide reduction, 619
  nucleic acid metabolite transport, 370
  seed imbibition, 677
Celery, mannitol synthesis pathway, 869
Cell (*see also* Guard cell)
  ABA-induced freezing resistance, wheat/rye/bromegrass, 71
  intracellular potentials and far-red light, spinach, 671
  line, NaCl-selected and wild type comparison, tobacco, 624
  purine biosynthesis, squash, 766
  suspension culture
    calcium release, soybean, 698
    ethylene production, pear, 1013
    polygalacturonase, *Marchantia*, 216
  UV stimulation and pH regulation, rose, 20
  wall
    proteinase, bean, 576
    proton-metal cation exchange, *Nitella*, 865
    suberization, green fiber, cotton, 521
  water stress-adapted, osmotic adjustment, tomato, 834
Cercosporin, singlet oxygen and superoxide production, 855
Cherry, fruit polyribosomes, 754
Chilling, root, soybean, 778
Chitosan, calcium release, soybean, 698
Chlamydomonas reinhardii
  carbon transport, mutant, 273
  CO_2 and growth, mutant, 268
Chlorophyll
  fluorescence, and O_2 evolution, spinach/barley leaf, 534, 542
  fluorescence quenching by O_2, algae/higher plants, 886
  organization and function, iron starvation, cyanobacteria, 250
  ozone effect, hybrid poplar, 291
  -protein complex, *Porphyridium*, 36
Chlorophyll *a*, organization in Chl *a*/*b* protein complex, bean, 16
Chlorophyllide, and Pchlide, cucumber, 79
Chloroplast
  ascorbate uptake, spinach, 41
  calcium-selective site in PSII, spinach, 309

envelope membrane protein, pea, 569
flooding and starch accumulation, sunflower, 195
high K^+ photosynthesis, spinach, 169
ion content, salt-stressed spinach, 238
light-dependent fatty acid synthesis, spinach, 11
O_2 evolution, brown algae, 889
oxygen photoreduction, *Panicum*/corn, 1038
phosphorylase activity, spinach, 709
protein, senescence, oat/bean, 507
superoxide dismutase, maize, 31
Chromatin, nucleoli fractionation, soybean, 746
Circadian rhythm, PSII, *Gonyaulax*, 329
Citrus jambhiri, field-measured water potential, 609
Citrus limon L. (*see* Lemon)
Citrus paradisi (*see* Grapefruit)
Citrus sinensis L. (*see* Orange)
CO_2
and growth, *Chlamydomonas* mutant, 268
burst
environmental response, geranium, 25
photorespiration, tobacco, 978, 983
fixation, *Moricandia*/*Panicum*, 740
ribulose bisphosphate carboxylase, soybean, 729
uptake
nonstomatal inhibition by ABA, *pharbitis*, 529
quantum yield, C_3/C_4 plants, 555
Coffea sp., methylxanthines and methyluric acids, 961
Coleus blumei, IAA decarboxylation, 1
Commelina communis, ADPglucose synthesis, guard cells, 862
Corn
fluorescence quenching by O_2, 886
glycine metabolism, 118
IAA deuteration, 445
ion uptake and transport, mesocotyl, 153, 159
oxygen photoreduction, 1038
potassium transport, root, 208
scutellum lipase, 460
Cotton
photosynthetic rate control, 658, 662
suberin in green fiber, 521
Cotyledon
arginine catabolism, pea, 525
cyanide-resistant respiration, black gram, 82
diamine oxidase development, pea, 1062
invertase activity, radish, 304
kinetin-treated, invertase activity, radish, 304
Pchlide/Chlide, cucumber, 79
Cowpea
seed imbibition, 677
temperature and nitrogenase, 392
Crassulacean acid metabolism
nuclear magnetic resonance study, *Kalanchoë*, 517
Talinum, 718
Cucumber
herbicide analog activity, 939
Pchlide/Chlide, cotyledon, 79
Cucumis sativus (*see* Cucumber)
Cucurbita pepo (*see* Pumpkin, Squash)
Cyanide
-resistant respiration, black gram, 82
respiration inhibition, *Allomyces* gametangia, 111
Cytochrome *f*/*b*-563-deficient mutant, maize, 452
Cytokinin
content, and roots, bean leaf, 76
Ginkgo leaf, 223
metabolism, and thidiazuron, *Phaseolus*, 796

D

Daucus carota (*see* Carrot)
Decarboxylation, IAA, *Coleus* petiole, 1
3,4-Dehydroproline, proline hydroxylation inhibition, carrot, 324
Deuterium oxide, IAA metabolism analysis, corn, 445
Diamine oxidase, development, pea, 1062
Dianthus chinensis L., phosphofructokinase, leaf tissue, 66
Dihydrodipicolinic acid reductase, maize, 687
Diurnal rhythm, sucrose biosynthesis, soybean, 428
Dormancy
gibberellins, wild oat seed, 791
rice seed, 381

E

Echinochloa crus-galli, photosynthetic development and anaerobiosis, 332
Elaeis guineensis (*see* Oil palm)
Electron transport
benzylaminopurine and malate oxidation, potato, 945
Chl fluorescence quenching, algae/higher plants, 886
Fe-S centers, *Aphanocapsa*, 724
maize root, 182
wheat, 192
Embryo
germination, mRNA translation, maize, 484
gibberellins and embryogenesis, grape, 802
Embryogenesis, enhancement by tryptophan, rice, 142
Endoplasmic reticulum, globulin precursor biosynthesis, oat, 949
Endosperm, zein, maize, 915
Envelope membrane protein chloroplast, pea, 569
Enzyme activity, germinating seedling, oil palm, 1028
Epicotyl, RNA and protein metabolism, pea, 809, 817, 822
Ethylene
amylase synthesis, wheat, 692
and auxin, Pellia, 395
leaf senescence, rice, 881
production
auxin metabolism, tobacco/sugar beet, 598
bicarbonate/CO_2-enhanced, bean, 784
fruit cells, pear, 1013
light, sunflower/tomato/soybean, 758
stem lateral expansion, pea, 407, 413

F

Fatty acid synthesis, light dependence, spinach, 11
Fatty acid synthetase system, leek, 614
Flooding
leaf gas exchange, tomato, 475, 480
starch accumulation, sunflower, 195
Fluorescence quenching, O_2, algae/higher plants, 886
Fluridone, vivipary, maize, 899
Formate dehydrogenase, soybean, 858
Freezing injury, root development, rye/wheat, 773
Freezing resistance, ABA-induced, wheat/rye/bromegrass, 71
Fructose 2,6-bisphosphate, phosphofructokinase activity, pea, 188
Fruit
ethylene production and auxin, pear, 1013
polyribosomes, apple/cherry, 754
regreening/degreening and nutrition, citrus, 243
ripening, membrane changes, apple, 636
Fucus vesiculosis
fluorescence quenching by O_2, 886
O_2 evolution, 889

G

Gas exchange, flooding effects, tomato leaf, 475, 480
Geranium, post-lower illumination CO_2 burst, 25
Germination
enzyme activity and metabolism, oil palm, 1028, 1033
mitochondrial activity, *Typha*, 995
mRNA translation, maize, 484
water relations, tomato, 935
Gibberellic acid, growth kinetics, oat, 566
Gibberellin
purification and separation, pea/apple/anise, 398
reversible conjugation, maize, 340
seed dormancy, wild oat, 791
somatic embryos, grape, 803
Ginkgo biloba L., cytokinin, leaf, 223
Globulin, precursor biosynthesis and ER, oat, 949
Glucose-6-phosphate, sucrose phosphate synthase regulation, spinach, 989
Glutamine, leucine uptake regulation, barley, 135
Glyceollin I, radioimmunoassay, soybean, 233
Glycine max L. (*see* Soybean)
Glycine metabolism, corn leaf discs, 118
Glycolate metabolism, spinach, 147
Glycoprotein, leaf storage, soybean, 125
Glyoxylate metabolism, spinach, 147
Gonyaulax polyedra, circadian rhythm in PSII, 329
Gracilaria tikvahiae, light-harvesting system, 353, 361
Grape
^{14}C distribution, photosynthetic serine and phosphoglycerate, 579
gibberellins in somatic embryos, 803
malate formation, 582
Grapefruit
low-temperature proline translocation, 877
nutrition and regreening/degreening, 243
Gravity, calcium transport, maize, 874
Growth
chloroplast phosphorylase activity, spinach, 709
CO_2 requirement, *Chlamydomonas* mutant, 268
IAA and GA, effects, oat stem, 566
regulators, seed dormancy, wild oat, 791
response, and IAA content, bean, 130
root-zone temperature effects, tomato, 46
Guard cell, ADPglucose synthesis, *Commelina*, 862

H

H^+ efflux, and photosynthesis, *Asparagus*, 828

H^+-ATPase
inhibitor sensitivity, *Hevea*, 973
two types, oat root, 921
Helianthus annuus L. (*see* Sunflower)
Helminthosporium maydis, race T-toxin synthetic analogs, 440
Herbicide, analog activity, cucumber, 939
Hevea brasiliensis, inhibitors and tonoplast H^+-ATPase, 973
Hordeum vulgare (*see* Barley)
Hormones, leaf gas exchange, tomato, 480
Hydrilla verticillata, photosynthetic mechanisms, 488
Hydrogen sulfide emission, role of *O*-acetylserine, pumpkin, 560
Hydroxyproline, oxygen fixation, maize, 860

I

Iminopeptidase, primary leaf, wheat, 1048
Immunofluorescence, lipoxygenase, soybean, 262
Indole-3-acetic acid
decarboxylation, *Coleus* petiole, 1
deuteration, corn, 445
growth kinetics, oat, 566
growth response, bean, 130
transport, oat, 316
Invertase activity, kinetin-treated cotyledon, radish, 304
Ion content, salt-stressed spinach, 238
Ionic osmoregulation, salt adaptation, *Synechococcus*, 377
Iron deficiency, Chl organization, cyanobacteria, 250
$Iron^{III}$ reduction, peanut/sunflower/maize, 893
Iron-sulfur centers, iron-deficient culture, *Aphanocapsa*, 724

J

Jack beans, arginine and canavanine metabolism, 965

K

Kalanchoë tubiflora, nuclear magnetic resonance study of CAM, 517
$KHCO_3$ efflux, UV-irradiated cells, rose, 20
Kinetin-treated cotyledon, invertase activity, radish, 304

L

Laminaria saccharina, O_2 evolution, 889
Lateral expansion, ethylene-induced, pea, 407, 413
Leaf
O-acetylserine and H_2S emission, pumpkin, 560
asparagine synthesis and inhibition, pea, 165
ATP-dependent proteolytic activity, spinach, 902
^{14}C distribution, photosynthetic serine and phosphoglycerate, grape, 579
carbohydrate inhibition of photosynthesis, wheat, 681
carbon assimilation and export, soybean, 297
cell wall proteinase, bean, 576
chloroplast phosphorylase activity, spinach, 709
chloroplast protein, senescence, oat/bean, 507
cytokinin, *Ginkgo*, 223
discs, glycine metabolism, corn, 118
ethylene and senescence, rice, 881
ethylene production and auxin metabolism, tobacco/sugar beet, 598
fatty acid synthetase system, leek, 614
field-measured water potential, *Citrus*, 609
gas exchange, flooding effects, tomato, 475, 480
glycolate metabolism, spinach, 147
growth, cytokinin, and roots, bean, 76
iminopeptidase, wheat, 1048
ion content, salt-stressed spinach, 238
light and ethylene production, sunflower/tomato/soybean, 758
mannitol synthesis pathway, celery, 869
mesophyll protoplast isolation, soybean, 1067
nodulatioa effect on photosynthesis, soybean, 713
nuclear magnetic resonance study of CAM, *Kalanchoë*, 517
O_2 evolution and Chl fluorescence, spinach/barley, 534, 542
ozone and photosynthesis, hybrid poplar, 291
phosphofructokinase, *Dianthus*, 66
phospholipids and phospholipase, black oak, 179
photorespiration, CO_2 burst, geranium, 25
photosynthesis and ribulose bisphosphate carboxylase, rice, 1002
photosynthetic parameters, wheat, 192
pyruvate orthophosphate dikinase, wheat, 853
ribulose bisphosphate carboxylase activity, soybean, 729
ribulose bisphosphate carboxylase synthesis, barley, 906
senescence, and pod removal, soybean, 121
starch metabolism, bell pepper, 61
storage glycoprotein, soybean, 125
sucrose phosphate synthase regulation, spinach, 989
Leek
N-acetyl methionine reduction sulfoxide, 619
fatty acid synthetase system, 614
Lemna gibba, K uptake rhythm and azide, 605
Lemon, plastic film and water stress alleviation, 87
Leucine uptake, regulation by glutamine, barley, 135
Light
and shade effects, abscission, soybean, 434
control of abscission, mung bean, 450
ethylene production, sunflower/tomato/soybean, 758
far red, and intracellular potentials, spinach mesophyll, 671
fatty acid synthesis, spinach, 11
-harvesting Chl *a/b* protein complex, Chl *a* organization, bean, 16
-harvesting system, *Gracilaria*, 353, 361
mycorrhizal soybean, 969
nitrate reductase induction, soybean, 56
ribulose bisphosphate carboxylase, soybean, 729
singlet oxygen and superoxide production by cercosporin, 855
Lignification, disease and enzyme regulation, tobacco, 550
Lipase, seedling scutellum, corn, 460
Lipid biosynthesis, mustard, 929
Lipoxygenase immunofluorescence, soybean, 262
Lycopersicon esculentum (*see* Tomato)

M

Macrocystis integrifolia
fluorescence quenching by O_2, 886
O_2 evolution, 889
Maize
Cyt *f/b*-563-deficient mutant, 452
dihydrodipicolinic acid reductase, 687
Fe^{III} reduction, 893
fluridone and vivipary, 899
gravity-induced calcium transport, 874
oxygen fixation into hydroxyproline, 860
reversible gibberellin conjugation, 340
mRNA translation, germination, 484
starch synthase solubilization, 175
superoxide dismutase, chloroplast, 31
transplasmamembrane electron transport, root, 182
zein in endosperm culture, 915
Malate
formation, grape, 582
oxidation, and benzylaminopurine, potato, 945
Malus domestica (*see* Apple)
Mannitol synthesis pathway, celery, 869
Marchantia polymorpha, polygalacturonase from suspension culture, 216
Medicago sativa L. (*see* Alfalfa)
Membrane (*see also* Pit membrane, Plasma membrane)
chloroplast protein, senescence, oat/bean, 507
microsomal changes, fruit ripening, apple, 636
permeability, calcium release, soybean, 698
photosynthetic, *Porphyridium*, 36
phytoalexin elicitor receptor, soybean, 497
sieve tube hydraulic conductivity, willow, 1042
transplasmamembrane electron transport, maize root, 182
Mesocotyl, ion uptake and distribution, corn, 153, 159
Mesophyll
chloroplast, oxygen photoreduction, *Panicum*/corn, 1038
far-red light and intracellular potentials, spinach, 671
photosynthesis and H^+ efflux, *Asparagus*, 828
protoplast isolation, soybean, 1067
Methionine, 5-methylthioribose recycling, avocado/tomato, 257
5-Methylthioribose, recycling to methionine, avocado/tomato, 257
O-Methyltransferase synthesis, and infection response, tobacco, 550
Methyluric acid, and methylxanthine, *Coffea*, 961
Methylxanthine, and methyluric acid, *Coffea*, 961
Mitochondria
activity during germination, *Typha*, 995
benzylaminopurine and malate oxidation, potato, 945
NAD^+ effects, potato, 1024
Moricandia arvensis, CO_2 fixation, 740
Mung bean
light control of abscission, 450
seed imbibition, 677
Mustard, lipid biosynthesis, 929
Myriophyllum spicatum L., photosynthetic mechanisms, 488

N

^{15}N enrichment, and N_2 fixing, soybean, 514
NAD^+, mitochondria, potato, 1024
Nereocystis luetkeana, O_2 evolution, 889
Nicotiana tabacum L. (*see* Tobacco)
Nitella flexilis, proton-metal cation exchange, 865
Nitrate
  reduction, water stress effect, soybean, 1065
  uptake and efflux, barley, 100, 105
Nitrate reductase, differential light induction, soybean, 56
Nitrite reduction, water stress effect, soybean, 1065
Nitrogen
  fixing, and ^{15}N enrichment, soybean, 514
  metabolism response, vegetative apex removal, soybean, 6
Nitrogenase, temperature effect, cowpea, 392
Nodulation
  effect on photosynthesis, soybean, 713
  regulation, soybean, 286
Nodule
  acetylene reduction rates, soybean, 648
  auxin metabolism, pea root, 347
  N_2 fixing and ^{15}N enrichment, soybean, 514
  temperature and nitrogenase, cowpea, 392
  water stress and nitrate/nitrite reduction, soybean, 1065
Nuclear magnetic resonance, study of CAM, *Kalanchoë*, 517
Nucleic acid, metabolite transport, castor bean, 370
Nucleoli fractionation, soybean, 746
Nucleoside disphosphate pentose, spinach, 1055
Nutrition, regreening/degreening control, citrus peel, 243

O

Oat
  chloroplast protein, senescence, 507
  ER and globulin precursor biosynthesis, 949
  H^+-ATPases, 921
  IAA and GA_3 effects, growth kinetics, 566
  IAA transport, 316
  permanganate oxidation of phytochrome, 471
Oil palm, seedling, enzyme activity and metabolism, 1028, 1033
Orange, nutrition and regreening/degreening, 243
Oryza sativa L. (*see* Rice)
Osmoregulation, salt adaptation, *Synechococcus*, 377
Osmotic adjustment, water stress-adapted cells, tomato, 834
Osmotic pressure, sieve tube, willow, 1042
Oxygen
  Chl fluorescence quenching, algae/higher plants, 886
  evolution
    algal chloroplasts, 889
    Chl fluorescence, spinach/barley leaf, 534, 542
  fixation into hydroxyproline, maize, 860
  photoreduction, chloroplast, *Panicum*/corn, 1038
  singlet production by cercosporin, 855
Ozone
  [^{14}C]photosynthate, bean, 630
  photosynthesis, hybrid poplar, 291
  ribulose-1,5-bisphosphate carboxylase, alfalfa, 185

P

Panicum maximum, oxygen photoreduction, 1038
Panicum miliaceum, oxygen photoreduction, 1038
Panicum milioides, CO_2 fixation, 740
Pea
  N-acetyl methionine sulfoxide reduction, 619
  arginine catabolism, 525
  asparagine synthesis and inhibition, 165
  atrazine binding and secondary PSII acceptor, 703
  chloroplast envelope membrane protein, 569
  diamine oxidase development, 1062
  ethylene-induced lateral expansion, 407, 413
  gibberellin purification and separation, 398
  phytohormones, *Rhizobium* mutants, and nodulation, 347
  polyamine transport, 912
  pyrophosphate-dependent phosphofructokinase activity, 188
  RNA and protein metabolism, 809, 817, 822
Peanut, Fe^{III} reduction, 893
Pear, ethylene production and auxin, 1013
Pelargonium × *hortorum* (*see* Geranium)
Pellia epiphylla L. endogenous auxin and ethylene, 395
Permanganate, oxidation of phytochrome, oat, 471
Peroxisome, glycolate metabolism, spinach leaf, 147
Persea americana (*see* Avocado)
pH
  sucrose phosphate synthase regulation, spinach, 989
  UV-irradiated cells, rose, 20
Pharbitis nil, CO_2 uptake inhibition by ABA, 529
Phaseolus lunatus L., thidiazuron and cytokinin metabolism, 796
Phaseolus vulgaris (*see* Bean)
Phosphate ester, xylem exudate, tomato, 464
Phosphoenolpyruvate carboxylase, photoregulation, *Salsola*, 735
Phosphofructokinase
  Dianthus leaf tissue, 66
  pyrophosphate-dependent activity, pea, 188
Phosphoglycerate, and serine, ^{14}C distribution, grape, 579
Phospholipid, and phospholipase, black oak, 179
Phosphorus, root extracts and exudates, sudangrass, 761
Phosphorylase, chloroplast, spinach, 709
Photoreduction, oxygen, *Panicum*/corn, 1038
Photoregulation, phosphoenolpyruvate carboxylase, *Salsola*, 735
Photorespiration
  CO_2 burst
    geranium, 25
    tobacco, 978, 983
  photosynthetic mechanism mediation, aquatic angiosperms, 488
Photosynthate, SO_2 and O_3 effects, bean, 630
Photosynthesis
  circadian rhythm in PSII, *Gonyaulax*, 329
  H^+ efflux, *Asparagus*, 828
  high K^+ conditions, spinach, 169
  inhibition by carbohydrate wheat, 681
  nodulation effect, soybean, 713
  nonstomatal inhibition by ABA, *Pharbitis*, 529
  ozone effect, hybrid poplar, 291
  pod removal and leaf sensescence, soybean, 121
  rate control, cotton, 658, 662
  ribulose bisphosphate carboxylase, rice, 1002
  salinity effects, *Porphyra*, 643
  salt-stressed spinach, 238
  Talinum, 718
  wheat, 192
Photosynthetic development, anaerobiosis, *Echinochloa*, 332
Photosynthetic mechanism, aquatic angiosperms, 488
Photosynthetic membranes, *Porphyridium*, 36
Photosystem I/II, localization, barley, 203
Photosystem II
  calcium-selective site, spinach, 309
  photosynthetic circadian rhythm, *Gonyaulax*, 329
  secondary acceptor and atrazine binding, pea, 703
Phytoalexin, elicitor receptor, soybean, 497
Phytochrome, permanganate oxidation, oat, 471
Phytohormone, and nodulation, pea, 347
Pigment
  mutation, *Gracilaria*, 353, 361
  -protein complex comparison, soybean, 51
Pimpinella anisum L. (*see* Anise)
Pisum sativum (*see* Pea)
Pit membrane, pore plugging and xylem flow, alfalfa, 1020
Plasma membrane
  isolation, winter rye, 586
  vesicle orientation, carrot, 385
Plastid, terpenoid metabolism, bell pepper, 94
Pod removal, and leaf senescence, soybean, 121
Polyamine transport, pea, 912
Polygalacturonase, suspension culture, *Marchantia*, 216
Polyribosome, fruit, apple/cherry, 754
Polysaccharide, sugar-nucleotide precursors, spinach, 1055
Poplar, ozone, leaf age, and CO_2 exchange, 291
Populus deltoides × *trichocarpa* (*see* Poplar)
Porphyra perforata, salinity effects on photosynthesis, 643
Porphyridium cruentum, photosynthetic membranes, 36
Potassium
  nutrition and water relations, potato, 956
  transport, corn, 208
  uptake and distribution, corn, 153, 159
  uptake rhythm and azide, *Lemna*, 605
Potato
  N-acetyl methionine sulfoxide reduction, 619
  benzylaminopurine and malate oxidation, 945
  NAD^+ effects on mitochondria, 1024
  water relations and starch synthesis, 956
Poterioochromonas malhamensis, vacuoplast isolation, 418
Proline
  hydroxylation, inhibition by 3,4-dehydro-

Proline—*continued*
proline, carrot, 324
translocation, grapefruit tree, 877
Protein
chloroplast envelope membrane, pea, 569
chloroplast membrane, senescence, oat/bean, 507
metabolism, and RNA, pea, 809, 817, 822
Proteinase, cell wall, bean, 576
Proteolytic activity, ATP-dependent, spinach, 902
Protochlorophyllide, and Chlide, cucumber, 79
Proton flux, and root elongation, barley, 199
Proton-metal cation exchange, *Nitella*, 865
Protoplast
isolation, soybean, 1067
plasma membrane vesicle orientation, carrot, 385
Prunus avium L. (*see* Cherry)
Pumpkin, *O*-acetylserine and H_2S emission, 560
Purine biosynthesis, squash, 766
Pyrophosphate, phosphofructokinase activity, pea, 188
Pyrus communis L. (*see* Pear)
Pyrus malus L. (*see* Apple)
Pyruvate orthophosphate dikinase, wheat, 853

Q

Quercus robor L. (*see* Black oak)

R

Race T-toxin, synthetic analogs, *Helminthosporium*, 440
Radioimmunoassay, glyceollin I, soybean, 233
Radish, invertase activity, kinetin-treated cotyledon, 304
Raphanus sativus L. (*see* Radish)
Redox, herbicide analog states, cucumber, 939
Reproductive structure, abscission and ^{14}C partitioning, soybean, 434
Respiration
Allomyces gametangia, 111
cyanide-resistant, black gram, 82
Rhizobium japonicum, regulation of nodulation, soybean, 286
Rhizobium mutant, and nodulation, pea, 347
Ribulose bisphosphate carboxylase
anther-derived plants, African violet, 639
ozone, alfalfa, 185
photosynthesis, rice, 1002
response to light and high CO_2, soybean, 729
synthesis, barley, 906
wheat, 192
Rice
ethylene and leaf senescence, 881
photosynthesis and ribulose bisphosphate carboxylase, 1002
seed dormancy, 381
tryptophan enhancement of embryogenesis, 142
Ricinus communis (*see* Castor bean)
RNA, and protein metabolism, pea, 809, 817, 822
mRNA translation, germination, maize, 484
Root
auxin metabolism, pea nodules, 347
chilling, soybean, 778
cytokinin and leaf growth regulation, bean, 76
elongation, and proton flux, barley, 199
extracts and exudates, phosphorus effects, sudangrass, 761
Fe^{III} reduction, peanut/sunflower/maize, 893
freezing injury, rye/wheat, 773
gravity-induced calcium transport, maize, 874
H^+-ATPases, oat, 921
potassium transport, corn, 208
technetium absorption and transport, soybean, 849
transplasmamembrane electron transport, maize, 182
-zone temperature effects, tomato, 46
Rosa damascena (*see* Rose)
Rose, UV-stimulated $KHCO_3$ efflux, 20
Rye
ABA-induced cold hardiness, 71
plasma membrane isolation, 586
root freezing injury, 773

S

Safflower, *N*-acetyl methionine sulfoxide reduction, 619
Saintpaulia ionantha (*see* African violet)
Salinity
cell line comparison, tobacco, 624
photosynthesis, *Porphyra*, 643
Salix exigua (*see* Willow)
Salsola soda L., phosphoenolpyruvate carboxylase photoregulation, 735
Salt adaptation, ionic osmoregulation, *Synechococcus*, 377
Sap flow, and pressure change, sugar maple, 277
Scenedesmus obliquus, fluorescence quenching by O_2, 886
Scutellum
leucine uptake regulation by glutamine, barley, 135
lipase, corn, 460
Secale cereale L. (*see* Rye)
Seed
arginine catabolism, pea, 525
dormancy
gibberellins, wild oat, 791
rice, 381
fluridone and vivipary, maize, 899
formate dehydrogenase, soybean, 858
imbibition, volumetric components, castor bean/mung bean/cowpea, 677
lipid biosynthesis, mustard, 929
lipoxygenase immunofluorescence, soybean, 262
pyrophosphate-dependent phosphofructokinase activity, pea, 188
starch syntheis, triticale, 652
water relations, tomato, 935
Seedling
C/N metabolism and vegetative apex removal, soybean, 6
enzyme activity and metabolism, oil palm, 1028, 1033
IAA transport, oat, 316
ion uptake and transport, corn mesocotyl, 153, 159
nitrate reductase induction, soybean, 56
nucleic acid metabolite transport, castor bean, 370
oxygen fixation into hydroxyproline, maize, 860
plasma membrane isolation, rye, 586
scutellum lipase, corn, 460
Senescence
chloroplast protein, oat/bean, 507
leaf, role of ethylene, rice, 881
Serine, and phosphoglycerate, ^{14}C distribution, grape, 579
Shikimate pathway activity, tobacco callus, 228
Sieve tube, turgor and osmotic pressure response, willow, 1042
Sinapis alba L. (*see* Mustard)
Sodium, uptake and distribution, corn, 153, 159
Sorghum vulgare (*see* Sudangrass)
Soybean
acetylene reduction rates, 648
arginine and canavanine metabolism, 965
C/N metabolism and vegetative apex removal, 6
cadmium uptake, 844
carbon assimilation and export, 297
chitosan-induced calcium release, 698
formate dehydrogenase, 858
glyceollin I radioimmunoassay, 233
leaf storage glycoprotein, 125
light and ethylene production, 758
lipoxygenase immunofluorescence, 262
mesophyll protoplast isolation, 1067
mycorrhizal, light effects, 969
N_2 fixing and ^{15}N enrichment, 514
nitrate reductase induction, 56
nodulation effect on photosynthesis, 713
nucleolar chromatin and preribosomal particles, 746
phytoalexin elicitor receptor, 497
pigment-protein complex comparison, 51
pod removal and leaf senescence, 121
regulation of nodulation, 286
reproductive abscission and ^{14}C partitioning, 434
ribulose bisphosphate carboxylase activity, 729
root/shoot chilling, 778
sucrose biosynthesis, diurnal rhythm, 428
technetium absorption and transport, 849
ureide analysis, 511
water stress adaptation, 422
water stress and nitrate/nitrite reduction, 1065
Spinach
N-acetyl methionine sulfoxide reduction, 619
ascorbate uptake, chloroplast, 41
ATP-dependent proteolytic activity, 902
calcium-selective site in PSII, 309
chloroplast phosphorylase activity, 709
far-red light and intracellular potentials, 671
glycolate metabolism, 147
high K^+ photosynthesis, 169
light-dependent fatty acid synthesis, 11
nucleoside disphosphate pentoses, 1055
O_2 evolution and Chl fluorescence, 534, 542
salt-stressed, photosynthesis, 238
sucrose phosphate synthase regulation, 989
Spinacia oleracea (*see* Spinach)
Squash, purine biosynthesis, 766
Starch
accumulation
flooding, sunflower, 195
root-zone temperature effects, tomato, 46
metabolism, bell pepper leaf, 61
synthesis
triticale, 652
water relations, potato, 956
Starch synthase, solubilization, maize, 175
Suberin, green fiber, cotton, 521

Sucrose biosynthesis, diurnal rhythm, soybean, 428
Sucrose phosphate synthase, regulation, spinach, 989
Sudangrass, root extracts and exudates, phosphorus effects, 761
Sugar beet, ethylene production and auxin metabolism, 598
Sugar maple, sap flow and pressure change, 277
Sulfur dioxide, [^{14}C]photosynthate, bean, 630
Sunflower
  Fe^{III} reduction, 893
  flooding and starch accumulation, 195
  light and ethylene production, 758
Superoxide dismutase, maize, 31
Synechococcus 6311, ionic osmoregulation and salt adaptation, 377
Synechococcus cedrorum, iron deficiency and Chl organization, 250

T

Talinum calycinum, C_3 photosynthesis and CAM, 718
Temperature
  change, sap flow and pressure change, sugar maple, 277
  effect on nitrogenase, cowpea, 392
  low
    proline translocation, grapefruit, 877
    water relations, tomato, 935
  root-zone effects, tomato, 46
Technetium, absorption and transport, soybean, 849
Terpenoid metabolism, bell pepper plastid, 94
Thidiazuron, cytokinin metabolism, *Phaseolus*, 796
Tobacco
  disease and enzyme regulation, 550
  estimation of photorespiration, 978, 983
  ethylene production and auxin metabolism, 598
  NaCl-selected and wild type comparison, 624
  shikimate pathway activity, 228
Tomato
  light and ethylene production, 758
  5-methylthioribose recycling to methionine, 257
  osmotic adjustment, 834
  phosphate esters in xylem exudate, 464
  root-zone temperature effects, 46
  soil flooding and leaf gas exchange, 475, 480
  water relations, 935
Tonoplast-bound ATPase, inhibitor sensitivity, *Hevea*, 973
Translocation, root-zone temperature effects, tomato, 46
Triticale, starch synthesis, 652
Triticum aestivum L. (*see* Wheat)
Triticum durum (*see* Wheat)
Tryptophan, enhancement of embryogenesis, rice, 142
Turgor, sieve tube, willow, 1042
Typha latifolia L., mitochondrial activity during germination, 995

U

Ultraviolet-stimulated $KHCO_3$ efflux, rose, 20
Ulva sp., fluorescence quenching by O_2, 886
Ureide, automated analysis, soybean, 511

V

Vacuoplast isolation, *Poterioochromonas*, 418
Vegetative apex removal, C/N metabolism response, soybean, 6
Vesicle orientation, plasma membrane, carrot, 385
Vigna mungo L. (*see* Black gram)
Vigna radiata L. (*see* Mung bean)
Vigna unguiculata L. (*see* Cowpea)
Vitis vinifera L. (*see* Grape)
Vivipary, and fluridone, maize, 899

W

Water
  potential, field-measured, *Citrus*, 609
  relations
    starch synthesis, potato, 956
    tomato, 935
  stress
    adaptation, soybean, 422
    alleviation by plastic film, lemon/bell pepper, 87
    nitrate/nitrite reduction, soybean, 1065
Wheat
  ABA-induced cold hardiness, 71
  amylase synthesis, ABA and ethylene effects, 692
  carbohydrate inhibition of photosynthesis, 681
  photosynthetic parameters, 192
  primary leaf iminopeptidase, 1048
  pyruvate orthophosphate dikinase, 853
  root freezing injury, 773
Wild oat, gibberellins and seed dormancy, 791
Willow, turgor and osmotic pressure response, 1042

X

Xylem
  exudate, phosphate esters, tomato, 464
  flow, pit membrane pore plugging, alfalfa, 1020

Z

Zea mays L. (*see* Corn, Maize)
Zein, endosperm culture, maize, 915
